

Congratulations!!!

Dear New Parent-

The Down Syndrome Association of Central Kentucky would like to welcome you and your new baby to our community. If you are like most new parents, you have very little idea what Down syndrome will mean to your new baby and your family. The Down Syndrome Association of Central Kentucky is here to offer support and resources to assist you in your journey. We understand that you are facing many emotions right now.

You may be concerned that the future for your child and your family may be bleak and uncertain. Most information written more than five years ago will not be accurate, as new information and therapies are rapidly being discovered and refined. There are many services and specialists available to assist your family and your baby. Most of these services may come with no cost to you. You can look forward to a very bright future for your child!

We want to give you some key information including important healthcare guidelines, local and national resources, and an inspirational book entitled Gifts.

We also encourage you to complete the New Baby Welcome Form and return it to us in the provided envelope. This will ensure that we have you in our database so that we may best serve you in the future. Having this information will also allow us to mail you our bi-monthly newsletter, which contains a variety of information you will find useful and a calendar of upcoming events.

Again, we understand that you may be feeling overwhelmed right now. In time you will come to see that Down syndrome does not define your child or what he/she may achieve. Your child is wonderfully and miraculously made, and the future holds endless possibilities for this beautiful new baby!

Congratulations-

Board of Directors,

Down Syndrome Association of Central Kentucky
